

**Dylan Beinart**, The University of Western Australia, Western Australia

**Bio:**

Dylan Beinart is a medical graduate of The University and a medical science graduate from Duke University. He is co-inventor of a novel device that could help reduce the number of hospital admissions for cystic fibrosis patients.

**Presentation Title:**

*Identifying areas of clinical need for innovation*  
Presented by Mr Ming Yew and Dr Dylan Beinart

**Abstract:**

Most medical technologies fail due to a failure to understand the clinical need to which they are trying to address. Medical device innovation begins at the very beginning with an in depth look at understanding the medical problem.
