

Sarah McGarry, PhD, Princess Margaret Hospital for Children and Fiona Stanley Hospital, Western Australia

Bio:

Sarah McGarry is a senior occupational therapist and Post-Doctoral research fellow under former Australian of the Year, Fiona Wood. She currently works on the burns units at Princess Margaret Hospital for Children and Fiona Stanley Hospital. Her research projects focus on using wearable sensors and innovative noninvasive methods to measure biomarkers in patients. She is co-inventor and Founder of Iris Medical.

Presentation Title:

How to progress an area of need through to the clinic: A case study of Iris Medical
Presented by Dr Arjun Kausik, Dr Sarah McGarry

Abstract:

Once an area of unmet need is discovered and a potential solution found, there is a number of translational steps and de-risking strategies to get the technology through "The Valley of Death". Iris medical, an award winning SPARK Co-Lab alumni team, will present their approach through this journey.
