Support for Gold Coast World Surfing Reserve application

It is the opinion of Surfrider Foundation Gold Coast Tweed Branch that a World Surfing Reserve on the Gold Coast is inevitable and timely. Just as all levels of government are focusing on coastal issues and locally the community has come together to qualify and improve surfing amenity under the Gold Coast Surf Management Plan as a part of the Beaches Strategy.

As Surfrider Foundation is dedicated to the protection and enhancement of oceans, beaches and waves for all, we hope this application is successful given that is so widely supported by the community and will enhance the surfing amenity of the southern Gold Coast, which incidentally contributes billions of dollars annually towards the Gold Coast economy.

Yours for our oceans & beaches
