Dear Andrew

Congratulations on your organisations superb work in identifying, researching and acknowledging the Southern Gold Coast to become the 8th World Surfing Reserve globally.

The Gold Coast World Surfing Reserve proposal is a tremendous opportunity for the Gold Coast as it will recognise and celebrate our famous surfing culture, history, champions and iconic point breaks from Burleigh Headland to Snapper Rocks and preserve a lasting legacy for our future generations.

SWELL is honored to promote and embrace art in public places. Exhibiting a world-class sculpture exhibition along our fabulous Currumbin Beach and ocean walkway, sharing and celebrating this fabulous natural, active, cultural landscape.

SWELL endorses this proposal and welcomes the opportunity to collaborate through engagement of public art programs, through permanent and ephemeral sculpture themed around the surfing culture of our community.

We are pleased to see the unanimous support from State and Local government, environmental, arts, sports and community organisations, all of whom have an active role in preserving our coast line and upholding the history and legacy of our city.

You have our support

Warm regards

Natasha Edwards
